

Backpack Sprayer BP-502 Specifications

The Dramm Backpack Sprayer is a lightweight, easy to use chemical applicator that applies all formulations of chemicals. The Backpack Sprayer uses an electric diaphragm pump with a rechargeable battery for effortless application. There is no hand-pumping necessary. The battery can be used for up to 7 hours without recharging. Unlike conventional pump sprayers, the chemical solution tank is never under pressure, adding a measure of safety.

Designed for efficient spot spraying, the Backpack is compact and lightweight, allowing complete free-

dom of movement. Padded shoulder straps and back rest ensure comfort while spraying.

For complete adaptability, the nozzle adjusts from a straight stream to a fine mist.

The Backpack comes standard with the pump and solution tank in one unit, one rechargeable battery with maintainer, and trigger spray wand.

Features

- Variable nozzle delivers straight stream to fine mist
- Rechargeable battery with charging unit
- Easy clean up
- Padded shoulder straps and backrest
- Compact design with drip proof frame

Technical Data

Power Supply- Sprayer	12 volts DC
Power Supply- Charger	120 volts AC
Maximum Pressure	100 PSI
Maximum Discharge Rate	1 gallon/ minute
Micron Size	60- 100µ
Battery Recharge Time	Overnight (6- 8 hours)
Length of Charge	6- 7 hours
Weight Empty	18.5 lbs.
Weight Full	58.5 lbs.
Solution Tank Volume	5 gallons
Wand Length	19"
Spray Distance From Wand	5- 7 feet
Backpack Dimensions	7.5" x 18.5" x 25"
Warranty	Six months parts and labor
