

Heavy-Duty Hose Reel

Heavy-Duty Hose Reel

The Damm Heavy-Duty Hose Reel is the perfect match for Damm ColorStorm Hose. Durable, like ColorStorm Hose, our Heavy-Duty Reel includes features to make watering easier. A convex design prevents the hose from pinching against the side wall. A spring-pin lock keeps the reel from unwinding when not in use. An adjustable break can prevent freewheeling of the reel. A stainless steel axle and PTFE bearings make winding easy.

The Heavy-Duty Hose Reel can hold up to 175' of 5/8" or 150' of 3/4" Damm ColorStorm Hose and includes a 10' x 3/4" leader hose for easy connection to the tap. Includes a mounting bracket with different mounting options.

Specifications

Holds: 175' x 5/8" ColorStorm Hose
