

# K-10 pulsFOG®

## K-10 pulsFOG®

The Dramm K-10 PulsFOG quickly applies chemical solutions as a fog. Able to treat up to 50,000 square feet with one tankful of solution in as little as 45 minutes, the K-10 will propel the fog up to 50 feet from the operator. The PulsFOG is great for the application of insecticides, fungicides, disinfectants, foliar fertilizers and for frost protection.

The fast-fogging method allows for very quick application from a distance, reducing labor and chemical exposure.

PulsFOG units usually require the addition of a carrier solution added to the water and chemical mixture for best operation. Contact Dramm for the proper solution for your needs.

### Specifications

Tank capacity - 10 liter

Fuel capacity - 2 liter

Power - 6 V (4: 1.5 V D batteries)

Force - 25 hp

Output - 10 liters/45 min

Distance propelled VKII/NF - 45 ft

Weight empty - 18 lbs
