

Hose Guide

The heavy-duty hose guide protects plants from damage and makes hand watering easier.

The galvanized steel frame with a 12" stake provides sturdiness that won't bend with pressure.

The 6" nylon roller is large enough prevent the hose from riding over the top and moves freely so that the hose won't catch. The steel handle makes insertion and removal easy. Great for both watering and spray hose.

Specification

Construction: Galvanized steel & nylon roller

Length of Stake: 12"

Roller Height: 6"
